

ALI HASSAN

Full-Stack Engineer | Creative Technologist | Founder

+201065503400 | alihassancut@gmail.com | Cairo, Egypt
github.com/alizidanjr | linkedin.com/in/alizidanjr | ali-cv-seven.vercel.app

PROFESSIONAL SUMMARY

Full-stack software engineer and creative technologist with proven expertise in designing, building, and shipping scalable web applications and digital products. Proficient in React, TypeScript, Python, and modern backend infrastructure (InsForge, Supabase) with strong focus on product architecture, system design, and end-to-end product ownership. Experienced founder building creator economy platforms. Mentor emerging developers on AI integration and creative workflow optimization.

WORK EXPERIENCE

Creative Technologist | VYVE Creators

January 2026 – May 2026

- Architected and developed core full-stack features for creator economy platform covering monetization, brand partnerships, community tools, and content management
- Owned complete product lifecycle for assigned features—from UX/UI design and frontend architecture to backend implementation and production deployment
- Applied creative technologist approach to bridge design aesthetics with robust technical execution across React frontend and backend services
- Shipped production features with focus on technical excellence, user experience, and system reliability

Full-Stack Developer | TFP Models

2025 (Freelance)

- Architected scalable SaaS platform using Supabase with secure multi-role authentication and advanced database management for talent booking workflows
- Engineered live booking system with real-time availability updates, embedded video conferencing, and instant push notifications
- Built real-time communication tools including in-app messaging with distributed team collaboration using TypeScript best practices
- Integrated automated email workflows for booking confirmations and transactional notifications

Full-Stack Developer | FAN-FIX

2025 (Freelance)

- Developed scalable QR-enabled web platform for secure user verification and gated access using React frontend and Python backend
- Designed creative UI/UX to bridge physical QR code scans with digital content and seamless access experiences
- Integrated geolocation features to unlock location-specific data upon successful verification
- Engineered system architecture for real-time QR processing with secure RESTful API integration and comprehensive edge case handling

Creative Technologist & Technical Consultant | Bin Assaf

2026 (Freelance) | Cairo, Egypt

- Provided strategic creative direction for visual content production strategy and executed professional photography and videography
- Integrated generative AI technologies to enhance creative output and benchmarked models for performance and creative accuracy
- Provided technical consulting on web application implementation and architecture
- Optimized project delivery through technical process improvements and Agile methodology across cross-functional teams

PROJECTS & VENTURES

Founder & Full-Stack Engineer | KENZO PROJECT (Creator Marketplace & Booking Platform)

2024 – Present | MVP Stage

- Built from zero: comprehensive creator marketplace platform enabling booking of diverse creator types (physical creators, AI avatars, digital talent)
- Engineered end-to-end booking system with creator profiles, availability management, booking workflows, and payment integration
- Tech stack: React (frontend), InsForge (backend infrastructure: auth, database, storage, deployment)
- Demonstrated full founder ownership: product strategy, technical architecture, frontend/backend development, and deployment

Creator Operating System | Modular Workflow Platform

2024 – Present

- Designed modular operating system to help creators manage bookings digitally and monetize creative workflows
- Architecture supports implementation across multiple platforms and creator tools
- Focuses on workflow optimization, booking management, and revenue enablement for creator economy

MENTORING & LEADERSHIP

- Mentored 2+ freelance developers on AI integration and practical AI implementation in creative workflows
- Guided freelancers on leveraging AI as a second brain and creative tool for productivity enhancement
- Provided technical guidance on AI-powered feature implementation and prompt engineering best practices

EDUCATION

Bachelor of Computer Science | Arab Academy for Science, Technology & Maritime Transport

2022 – 2025 | Cairo, Egypt | GPA: 3.1/4.0 (Very Good)

Dual Degree Program with University of Northampton, UK

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, React, Next.js, Node.js

Backend & Infrastructure: InsForge (auth, database, storage, deployment), Supabase, PostgreSQL, RESTful APIs, Database Architecture

Frontend & Design: UI/UX Design, Figma, CSS/SCSS, Responsive Design, Component Architecture

AI & Emerging Tech: Generative AI Integration, Claude AI, Prompt Engineering, AI Workflows

Development Practices: Git/GitHub, Agile Methodology, SOLID Principles, OOP, Testing, Code Review, Full-Stack Ownership

DevOps & Deployment: Vercel, CI/CD, Cloud Architecture, MCP

LANGUAGES

Arabic: Native Speaker

English: Professional Working Proficiency
